However, you are also welcome to suggest your own topic for a thesis. If you want to suggest a topic, please contact Prof. Dr. Barbara Schöndube-Pirchegger.

Organizational matters

The time for preparing the thesis coincides with the period in which classes take place.

All students writing their master's thesis under the supervision of our chair are required to hold a presentation on the current status of their thesis during a seminar. The presentations should take about 30 minutes and are followed by a discussion. They will usually be scheduled to take place in the last third of the period stipulated for writing the thesis.
